

TechNotes

Editor-Victoria B. Valentine, P.E.

October 27, 2015

This edition of TechNotes is scheduled to be the 2015 ICC Cycle A Online Governmental Consensus Voting Guide for the IBC and IEBC from NFSA. The online voting period was supposed to be from October 21 to November 3. However, during the Public Comment Hearings in Long Beach, CA, the electronic voting devices used onsite revealed some discrepancies during the voting periods. After extensive onsite evaluations of the devices, the ICC eliminated the use of the devices and reverted back to a visual count for each remaining motion. Because of the voting device discrepancies for previous motions, the ICC Board of Directors are meeting soon to discuss the last standing motion that occurred when the electronic voting devices were used. When these discrepancies are resolved, and the Online Governmental Consensus Voting period is announced, this edition of TechNotes will be released.
